## EXPERIENCE

---

### Software Developer

DHI Computer Services, Inc.

November 2024 – March 2025, Provo, Utah

- Develop and enhance web applications using Angular and C# by implementing new features and maintaining existing projects.
- Collaborate with designers to ensure UI/UX feasibility, create responsive interfaces with HTML, CSS (Scss/Sass), and troubleshoot technical issues.
- Participate in daily scrums, report progress to team leads, and assist with testing, debugging, and deployments in coordination with the Ops team.

### Software Development Engineer in Test

The Church of Jesus Christ of Latter-day Saints

April 2023 – September 2023, Riverton, UT

- Developed and executed automated test scripts using Selenium WebDriver and Sauce Labs integration, enabling parallel testing and reducing test execution time.
- Proficient in testing React-based web applications using JavaScript testing frameworks.
- Experience in creating comprehensive test plans and strategies tailored to different project requirements.

## PROJECTS

---

### Personal Website

[www.eddyog.com](http://www.eddyog.com) • January 2024 – July 2024

- Developed a personal portfolio using React.js, ThreeJS, TailwindCSS, Framer Motion.
- Designed and implemented a serverless, secure, and highly available web infrastructure on **AWS**. This involved utilizing **S3** for static asset hosting, **CloudFront** as a global Content Delivery Network (CDN) for performance and HTTPS enforcement, and **AWS Certificate Manager (ACM)** for SSL certificate management.
- Load, create and customize stunning 3D models and geometries with various lights, with understanding of 3D world with a camera and positioning of an object in space.

### Mobile Application E-Commerce (Android and iOS)

Personal Project • September 2023 – December 2023

- Designed and developed a cross-platform e-commerce mobile application using React Native, delivering a seamless user experience across iOS and Android platforms.
- Integrated MongoDB for efficient data storage and retrieval, and built RESTful APIs with Node.js to enable seamless app-database communication.
- Integrated JWT for secure authentication and authorization, enabling protected access to browsing, cart management, and order placement.

## EDUCATION

---

### Master of Information Systems Management MISM

Brigham Young University Marriott School of Business • Provo, Utah • 2026

### Bachelor of Science in Software Engineering.

Brigham Young University – Idaho • Rexburg, Idaho • 2023

## SKILLS

---

Development: Python, C++, HTML, CSS, Tailwind, JavaScript, PHP, Swift, React Native, Ruby/Rails, AWS.

Mobile Application: React Native, Mongoddb, RESTful APIs, JWT.
